Viking Series Steel Full Trip Power Reverse Plow

The Viking all steel full trip moldboard power reverse snow plow offers the advantages of a reversible plow, with the simplicity of a one way plow. The full trip feature allows the plow to go over an obstacle and return to the plowing position immediately. In addition, the chain lift allows for angling in raised or lowered positions providing for a constant level plow position.

The angle of attack (or the broke formed 10 GA steel moldboard) allows the plow to operate on surface treated or gravel surface while the extended hood allows for clean operation, preventing blowback at higher speeds.

Optional cutting edges available.

Model	Bulldozer Clearing Path	35 degrees Clearing Path	Overall Moldboard Height	Torsion Springs	Steel Mold-board	Vertical Ribs 3/8"	Cutting Edge Backer L	Approximate weight of plow & pushframe
VCL 36-11-45C	11'	9'	36	2	10 Ga.	12	4 x 6x1 /2	2,250 lbs
VCL 36-12-45C	12'	9' 10"	36	2	10 Ga.	12	4 x 6 x 1/2	2,489 lbs.
VCL 36-14-45C	14'	11' 6"	36	2	10 Ga.	12	4 x 6 x 1/2	2,732 lbs.
